Note 6 – Use of X97805 drain with either X97857 or X97858 basket is approved only when X97860 secondary fixed strainer is installed at all times

**Government
of South Australia**

Conditions of approval

1. SA Water accepts no responsibility for and does not vouch for the efficiency or performance of the product. This approval letter is not an endorsement of the product by the SA Water Corporation, and no claim shall be made through advertising, promotion or any other way.

2. The product shall be suitable for the designed application and intended environment, internally and externally for the stated life expectancy of the device.

3. The models shall be manufactured in accordance with the drawings submitted with the application and be supplied to the purchaser with installation instructions and procedures for maintenance and care.

4. Variation to the conditions of this approval may be necessary due to circumstances beyond the Corporation's control, such as changes in law. Where practicable to do so, the Corporation will give reasonable advanced notice in writing of such variation.

5. SA Water has assessed this product in principle for the use in a trade waste pre-treatment system. It has not assessed any other legislative requirements (i.e. plumbing standards).

6. This product approval may be revoked at any time if the conditions within are not adhered to.

7. Maximum hole size for all strainers is 2 mm.

8. Fixed secondary strainers to be fixed in place at all times.

9. All Kembla grates, traps and channel drains may be used in conjunction with the approved pre-treatment devices when compliant with the stipulations within this approval.

Yours Sincerely,

Ross Wardrope
Restricted Trade Waste Coordinator
